

3 Courses

Excel Time Series Models for Business Forecasting

Excel Regression Models for Business Forecasting

Judgmental Business Forecasting in Excel

Dec 23, 2025

Bryan Johns

has successfully completed the online, non-credit Specialization

Excel Skills for Business Forecasting

In this Specialization learners developed and mastered skills for business forecasting in three domains — Time Series Models, Regression Models, and Judgmental Forecasting. Learners have mastered a range of business forecasting models and skills in Microsoft Excel in order to manipulate data to generate business insights and business intelligence. The Specialization also focused on softer skills of analytical thinking, problem-solving, and critical thinking. Learners complete an assessment at the end of the Specialization which provided them with the opportunity to apply, evaluate, and critique the forecasting methods in a final case study.
