Statistics and Data Analysis with Excel: Essentials

Statistics and Data Analysis with Excel: Intermediate

Statistics and Data Analysis with Excel: Advanced

Dec 21, 2025

Bryan Johns

has successfully completed the online, non-credit Specialization

Statistics and Data Analysis with Excel

This Specialization certifies that the learner has developed essential skills crucial for today's dynamic job market. They have demonstrated proficiency in advanced statistical techniques and Excel-based data analysis, mastering the evaluation of complex data sets, the creation of dynamic visualizations, and the synthesis of predictive models. Through hands-on assignments using real-world data, they have gained the ability to apply their knowledge effectively, driving data-driven decisions and strategic insights across diverse professional contexts.

Assoc Prof Prashan S M Karunaratne, PhD
SFHEA
Associate Professor
Department of Actuarial Studies & Business Analytics
Macquarie Business School
