Data Storyteller & Analyst | Bridging Data, People, and Purpose

Curious, analytical, and globally minded, I combine critical thinking with empathy to turn complex data into clear, actionable insights. Using Python, SQL, and R, my work performs technically and the stories connect clearly, supporting real decisions and meaningful impact.

Data Science & Technical Training

Applied Analytics & Modeling

- Data Analytics Boot Camp – George Washington University
- Advanced Data Analytics – Google (Coursera)
- Statistical Learning (ISLP – Stanford Curriculum)

Computer Science Foundations

- CS50x: Introduction to Computer Science
- Artificial Intelligence (AI) – CS50 / HarvardX
- Python • R • SQL • Cybersecurity • Web Development

Education

M.A., International Affairs – American University, Washington, DC

M.A., Natural Resources & Sustainable Development – UN University for Peace, Costa Rica

B.A., International Development, – Evergreen State College, WA

- Study Abroad: University of Minnesota, Jaipur, India

Projects

Floodlines | Vermont Flood Mitigation Analysis

informedwanderer.com/workshop/floodlines

Python • GeoPandas • Leaflet.js • D3.js • OpenFEMA & Census API

Built a reproducible pipeline integrating FEMA flood risk, Census demographics, and mitigation funding records across Vermont's 250+ municipalities. Developed a need index, tested robustness across multiple model specifications, and deployed findings through an interactive public dashboard and narrative analysis.

Impact: Produced a transparent screening framework for identifying communities likely to be underserved by existing mitigation funding.

Classified: At Risk | Employee Attrition Prediction

informedwanderer.com/workshop/salifort-employee-churn

Python • Scikit-learn • XGBoost • SHAP

Developed a classification model (96.7% accuracy) to predict employee attrition. Selected XGBoost for best recall (0.94) and precision (0.87), minimizing attrition blind spots while reducing false positives. Used SHAP for model explainability and cross-validated with Logistic Regression and Random Forest.

Impact: Identified attrition risk by tenure, workload, and satisfaction.

Capital Crashpad | DC Airbnb Analysis

informedwanderer.com/workshop/capital-crashpad

Python • PostgreSQL • Flask • Leaflet.js

Built an interactive geospatial dashboard analyzing structural breaks in DC's short-term rental market following platform verification enforcement. Combined PostgreSQL and JavaScript visualizations to surface pricing shifts, listing contraction, and minimum-stay shifts.

Impact: Revealed that enforcement reshaped both ends of the market, not just low-performing units, reframing the narrative around regulatory market effects.

Experience

Supervisor and Lead Bartender
Tonic Restaurant, LLC

2012 - Present
Washington, DC

- Boosted sales by 20–30% and cut staffing costs 25% by designing and hosting a popular weekly trivia night that improved customer retention and streamlined scheduling.
- Managed up to 20 staff and reconciled nightly financials up to \$25K.
- Trained staff and solved complex problems in a dynamic, multicultural workplace, applying communication and rapid decision-making skills now used in data analysis.

Technical Skills

Languages: Python, R, SQL, JavaScript

Visualization: Matplotlib, Seaborn, Plotly, Leaflet, ggplot2, Tableau

ML & Modeling: scikit-learn, XGBoost, SHAP, TensorFlow/Keras

Data Wrangling & EDA: pandas, NumPy, Tidyverse

Databases: PostgreSQL, SQLite, MongoDB

Web Dev & Scraping: Flask, Django, REST APIs, Beautiful Soup

Dev Tools: Git, Jupyter, RStudio, VS Code

Publications

[PES and REDD+: The Case of Costa Rica](#) (Impact analysis of environmental payments)

Languages

Spanish (working proficiency), Hindi (elementary proficiency)

Fluent in Data. Fluent in Human.
