Data Storyteller & Analyst | Bridging Data, People, and Purpose

Curious, analytical, and globally minded, I combine critical thinking with empathy to turn complex data into clear, actionable insights. Using Python, SQL, and R, my work performs technically and the stories connect clearly, supporting real decisions and meaningful impact.

Data Science & Technical Training

Applied Analytics & Modeling

- Data Analytics Boot Camp – George Washington University
- Advanced Data Analytics – Google (Coursera)
- Statistical Learning (ISLP – Stanford Curriculum)

Computer Science Foundations

- CS50x: Introduction to Computer Science
- Artificial Intelligence (AI) – CS50 / HarvardX
- Python • R • SQL • Cybersecurity • Web Development

Education

M.A., International Affairs – American University, Washington, DC
M.A., Natural Resources & Sustainable Development – UN University for Peace, Costa Rica
B.A., International Development, – Evergreen State College, WA

- Study Abroad: University of Minnesota, Jaipur, India

Projects

Floodlines | Vermont Flood Mitigation Analysis
informedwanderer.com/workshop/floodlines
Python • GeoPandas • Leaflet.js • D3.js • OpenFEMA & Census API
Built a reproducible pipeline integrating FEMA flood risk, Census demographics, and mitigation funding records across Vermont's 250+ municipalities. Developed a need index, tested robustness across multiple model specifications, and deployed findings through an interactive public dashboard and narrative analysis.
Impact: Produced a transparent screening framework for identifying communities likely to be underserved by existing mitigation funding.

Capital Crashpad | DC Airbnb Analysis
informedwanderer.com/workshop/capital-crashpad
Python • PostgreSQL • Flask • Leaflet.js
Built an interactive geospatial dashboard analyzing structural breaks in DC's short-term rental market following platform verification enforcement. Combined PostgreSQL and JavaScript visualizations to surface pricing shifts, listing contraction, and minimum-stay shifts.
Impact: Revealed that enforcement reshaped both ends of the market, not just low-performing units, reframing the narrative around regulatory market effects.

Classified: At Risk | Employee Attrition Prediction
informedwanderer.com/workshop/salifort-employee-churn
Python • Scikit-learn • XGBoost • SHAP
Developed a classification model (96.7% accuracy) to predict employee attrition. Selected XGBoost for best recall (0.94) and precision (0.87), minimizing attrition blind spots while reducing false positives. Used SHAP for model explainability and cross-validated with Logistic Regression and Random Forest.
Impact: Identified attrition risk by tenure, workload, and satisfaction.

Experience

Supervisor and Lead Bartender **2012 - Present**
Tonic Restaurant, LLC **Washington, DC**

- Operational responsibility for teams of up to twenty, nightly revenue to $25,000.
- Grew slow-night revenue by 25% by identifying an underperforming time slot, designing a community event to address it, and building the operational habits to sustain it.
- Reduced staffing costs by 25% by adjusting both scheduling practices.
- Trained and mentored new staff, rebuilding the team post-COVID.

Technical Skills

Languages: Python, R, SQL, JavaScript
Visualization: Matplotlib, Seaborn, Plotly, Leaflet, ggplot2, Tableau
ML & Modeling: scikit-learn, XGBoost, SHAP, TensorFlow/Keras
Data Wrangling & EDA: pandas, NumPy, Tidyverse
Databases: PostgreSQL, SQLite, MongoDB
Web Dev & Scraping: Flask, Django, REST APIs, Beautiful Soup
Dev Tools: Git, Jupyter, RStudio, VS Code

Publications

PES and REDD+: The Case of Costa Rica (Impact analysis of environmental payments)

Languages

Spanish (working proficiency), Hindi (elementary proficiency)

Fluent in Data. Fluent in Human.
